The MASTERS OF BUSINESS ADMINISTRATION/HEALTH CARE prepares students with the practical skills and academic knowledge-base that are essential for managerial careers in health care. Working managers and emerging professionals will earn the degree that is the recognized workplace standard for leadership and management, and the competencies to survive and thrive in the changing world of healthcare. They will gain an in-depth knowledge of the issues and challenges facing healthcare today. Students will learn to deliver value by using business intelligence and analysis to make decisions, implementing projects through collaboration and teamwork, and exercising leadership to create change. Work experience in healthcare is required to enter this program.

Learning Outcomes — Graduates of the program will be expected to: be capable of leading themselves and others, demonstrate critical and problem-solving skills, be skilled in the analysis and strategic use of financial and other data and tools, operate strategically within the framework of markets, technology, regulation and resources, demonstrate cultural competence in diverse organizational settings, effectively manage change, complexity and uncertainty, and demonstrate professional integrity. They will understand health care systems and processes, ethical and public policy issues in health care and know how to manage quality, safety and cost-effectiveness in health care delivery.

Careers — Management and leadership positions in health care organizations such as hospitals, public and private health agencies, insurance companies and other health care businesses.
